5459*

Imperial Germany, Saxon Garde-Reiter (Guards Cavalry) Regiment Officers model 1889 metalhelme, in full parade configuration, a stunning remounted example, original German tombak metal body with stepped tombak front peak and 'lobster tail' neck guard all edged in German silver trim, this particular example was possibly only worn for parades since there is only one large hole on the top for attaching a top device, and lacking the usual four small holes to attach the everyday removable spike, the underside trim marked with 'G.R. 118' to the front peak and size stamp '57' to the rear neck guard, body stamped '58' twice near the parade mounting hole and '91', on the front of the body a good museum quality reproduction guards helmet plate with sunburst star and a cast Saxon centre wappen, a very convincing and extremely well constructed figural lion parade mount correctly fitted to the body with a large brass nut and long threaded bolt soldered to the base plate, old parade lion mount is highly crafted in 'neusilber' and very near accurate however exhibits some slight variation to other known examples, thus has been termed as a non-textbook museum quality reproduction example, the reverse of the royal cypher marked '121', brass convex leather backed chin scales secured with officers trefoil side rosettes and incorrect state and national cockades, old replaced leather officers liner and reproduction silk lining, the under side of the front peak and lobster tail with original leatherette, peeling at the edges. *An outstandingly attractive helmet that could be the centre point of any Imperial German display, extremely fine.*

A military/naval sporting tournament was held over two days on 20 and 21 June 1887 to celebrate Queen Victoria's Golden Jubilee. The first events were staged on Monday night at the Exhibition Building and the next day's events at the Agricultural Society's Show Grounds near Flemington Racecourse. The first above medal was awarded to the NSW Naval Artillery Volunteer team which won first place in Naval Cutlass Drill and in Sword and Bayonet.

In September 1893 the winner was announced for a competition staged for members of the N.A.V. Rifle Club (Naval Artillery Volunteer Rifle Club) who had been competing for a silver medal presented by the N.S.W. Rifle Association. The conditions were six shootings, the four highest to count, seven shots each at 500 yds and 600 yds. Sub-Lieut Falk was the winner with a total of 242 points (67, 59, 57, 59), well clear of the next best, AB Lester, with 228 points (60, 55, 57, 56).

In 1893 the N.A.V. Rifle Club also held a competition for The Sub-Lieut Falk Trophy. It was fired best two in a series of three shootings at 700 yards comprising ten shots, with handicap, limit 36 points. In 1893 the trophy was won by Lieut Keating with a score of 79 points for two best shootings out of three.

Awarded posthumous Victoria Cross for most conspicuous bravery in operations in the South-West Pacific Area (CAG No.14 21/1/1943). Citation reads,

At Milne Bay on the afternoon of the 4th September, 1942, a company of an Australian infantry battalion attacked the Japanese position East of the Buna Mission where it encountered terrific rifle and machine gun fire. The advance of the section of which Corporal French was in command was held up by fire from three enemy machine gun posts, whereupon, Corporal French, ordering his section to take cover, advanced and silenced one of the posts with grenades. He returned to his section for more grenades and he then attacked the third post, firing from the hip as he went forward. He was seen to be badly hit by fire from this post, but he continued to advance. The enemy

gun then ceased to fire and his section pushed on to find that all members of the three enemy gun crews had been killed and that Corporal French had died in front of the third gun pit. By his cool courage and disregard of his own personal safety, this non-commissioned officer saved the members of his section from heavy casualties and was responsible for the successful conclusion of the attack.

The Siege of Liege was the first land battle of WWI starting on 5 August and ending on 16 August. It was during this battle that the Germans introduced their previously secret weapon, namely Big Bertha, a 420mm siege howitzer which they used to nullify the twelve forts at Liege which protected the entrance to Belgium. Fort De Loncin was one of the forts and it was destroyed during the battle when the fort's ammunition magazine was hit by a large calibre German shell which killed most of the occupants. The site of the fort is now a military cemetery.
