The Jalayrids ruled in part of Iran from A.D. 1335-1432 and maintained separate coinage for their territories in the northwest, monetarily tied to Tabriz and in Iraq (including Khuzistan), where the Baghdad currency was used. At times the Jalayrid rulers were recognised in parts of the Muzaffarid lands (which used the Shirazi currency). Jalayrid coins struck in the Shirazi currency zone conform to the Shirazi weight standards. The Jalayrids were driven out by Timur in 1393, but staged a brief recovery, mainly in southern Iraq and Khuzistan after his death in 1404.

\$10,000

Ex Mediterranean Coins, Europe, c.2000-2001. The "Cross-band" issues are known for tetradrachms. Three tetradrachms are known and are in a private collection. They come from other magistrates (Komes, Peristratos and Timotheos). This example from Demophon makes the fourth example and is unpublished. It shares a common obverse die to two of the other known examples [Komes and Peristratos]. Philip Kinns in an email to Rod Sell noted the significance of these coins. Kinns also discusses these coins in Coin Hoards IX. Apparently all three previously known coins turned up in a twelve month period (August 1999 to September 2000). This piece and many of the drachms and fractions of this cross band series were acquired by Rod Sell in this same period and this may indicate a common source or hoard. A copy of this email comes with the lot.

Ionía, Ephesos, (1st century A.D.), AE 18, (4.44 grams), obv. stag to left, looking behind, above E - Φ, below in exergue, ΚΚΩΠΙ, all within border of dots, rev. bee, meaningless inscription, ΚΗΡΙΑΛΙΣΩΔΕΠΡΟΣΠΑΛΥΡΙΝ, (S.4944, BMC 186-190 [p.70], SNG von Aulock 1875 [Pl.57]). *Attractive deep brown patination, very fine and a rare type.*

\$150

It is believed in BMC that the reverse inscription is perhaps a magic formulae used as charms and remedies against various diseases or as Sear suggests a "bee charm". The piece itself has uncertain status. BMC suggested it could be a tesserae as likewise von Aulock. Its issue in Imperial times and apparent circulation also suggests its use as coinage as well. Certainly a most unusual piece and regarded by various scholars with some interest. A numismatic enigma.

3545*

Ionía, Ephesos, (1st century A.D.), tesserae, AE 14, (1.734 grams), obv. Medusa facing head, rev. bee, with open wings no inscription. *Very fine or better with attractive deep brown patination, very rare.*

\$100

Ex CNG Auction Sale XXV, March 24, 1993 (lot 309). The piece itself has uncertain status. It is suggested that it could be a tesserae or token made at Ephesos as Ephesos was a cult centre for Artemis. Its issue in either in the late Hellenistic period or early Imperial times is established on the basis of style. It also could have been in use as coinage. Certainly a most unusual piece.

Ionía, Ephesos, Kingdom of, Lysimachus, (323-281 B.C.), silver tetradrachm, (17.218 grams), Ephesos mint, style of that issued c.294-287 B.C., obv. head of Alexander to right, with diadem and horn of Ammon, within dotted border, dotted border, rev. Athena enthroned to left, supporting Nike, to inner left a bee, in exergue a monogram of ΣΓ, to left ΒΑΣΙΛΕΩΣ to right ΛΥΣΙΜΑΧΟΥ, (cf.S.6814, Thompson 166, M.426). *Well centred and with a very high relief of finest style, struck on a full flan with a superb eye, extremely fine and very rare.*

\$2,400

Ex Noble Numismatics Sale 65 (lot 1801). The early Ephesos mint issues of Lysimachus have some of the finest of the artistic representations of portraiture of Alexander the Great. The issue signed by a monogram and with the bee symbol is rarely seen in tetradrachms. It has a very similar style to the best of the fine "K" tetradrachms of Pergamon.

The first volume was originally published as the author's Habilitationsschrift (Universität Wien, 1992) "Die ältesten Münzen von Ephesos sind gleichbedeutend mit dem Beginn der Münzprägung überhaupt. Der Autor untersucht die wirtschaftlichen Voraussetzungen, die metrologischen, die technischen Grundlagen und widmet sich insbesondere der schwierigen Frage der Datierung durch eine spezifische Bestimmung der historischen Koordinaten. Neben einer Darstellung des Aufbaus der Münzprägung in Ephesos enthält dieser Band auch einen umfangreichen Bestimmungskatalog". The volume above includes an extensive bibliography (pp. 185-189).

According to Pridmore there were twenty million 1863 one mil coins produced. Nineteen million at the Royal Mint and one million at the Heaton Mint. He states there is no difference in the coins. There are however two varieties of the 1863 one mil. One variety has seriphs on the letters and the other does not. They seem to appear in an even number, so one can assume there were two master dies.
