Sir Robert Hotung KBE, 1862 - 1956 was a famous Hong Kong businessman and philanthropist. The son of a westerner and a Han Chinese woman of Shenzhen heritage, he was educated at Queen's College, graduating in 1878. With his bilingual skills, business acumen and dedication to hard work he became Head Compradore of Jardine, Matheson and Company until his retirement in 1889. He was the wealthiest person in Hong Kong and through his wife he funded many charities and was on several boards. He founded The Chinese Club in response to the colonial policy of excluding those who were not British or white from joining the exclusive Hong Kong Club. At the time in Hong Kong there was a policy in place under The Peak Reservation Ordinance that prevented Chinese from residing on The Peak however, because of his standing and wealth, this was waived for Robert Hotung and thus he became the first Chinese person to be allowed to live on The Peak. Sir Robert also financed different revolutions including the Xinhai Revolution led by Dr Sun Yat Sen which led to the establishment of the Republic of China.

\$900

Ex Noble Numismatics Sale 99 (lot 2734) coming from the Tom May Collection. See illustration of this coin in the paper 'A Renaissance Moment' published in Australasian Coin and Banknote, April 2008, p44.

The Sforza ('Strivers') dynasty began as many Italian noble houses did, with a successful condottiere (mercenary soldier) seeking respectability for his family by procuring a title and an estate. Muzio Attendolo (1369-1424) founded the family, and his son Francesco seized the duchy of Milan in 1450, having first married the daughter of Maria Filippo Visconti. Francesco's son Galeazzo succeeded him in 1466 and sought to have his position elevated to king, marrying the sister-in-law of the king of France to strengthen his claims. His rule over Milan was harsh, with heavy taxes causing widespread discontent, but his patronage of grand artists and architects was a source of great pride for the city and his assassination in 1476 by republican sympathizers was met with mixed feelings. In any case, the dynasty survived, in the person of his weak son, Gian Galeazzo. Originating in Renaissance Milan, where it was first issued in 1468, the testone was a large denomination of good silver and was so-called because its obverse bore a naturalistically-styled head (testa) of the reigning duke. Owing to the influx of silver as a result of trade fueled by new sources of ore, the Milanese Sforza family used the denomination to promote their power and regional influence. They followed Renaissance artistic principles, and the portraits of the family are presented

in a more naturalistic and accurate manner than stylized medieval portraits. Like the French gros tournois of the thirteenth century, the testone gained popular acceptance and soon other areas in Italy began minting similar coins, bearing portraits of their own rulers. By the end of the fifteenth century, France, England, and Scotland began minting their own versions, known as the teston in France, and the testoon in England and Scotland, these coins with their Renaissance-style portraits may be viewed as the first modern European coinages.
