\$5,000

This example is a variant from the example sold by The New York sale XIV, on January 10, 2007 (Lot 649). The cataloguers then added a footnote to that lot which is appended below and for which acknowledgement is given: "This coin is widely believed to have been struck during Charles II's reign at Mumbai. The Persian legends on both sides have not been read successfully though it has great resemblance with that of the Rupees of James II and William and Queen Mary. The earliest East India Company coinage bearing Persian inscription began to circulate during the time of Charles II. In 1763 Martin Folkes reported that "the English Merchants trading in the East Indies struck silver money in India for the use of their factory at Bombaim. Of these he had seen the Anglina, Pax Deo and a third sort of rupee which had again only the Company's arms on the one side and Arabic or Indian characters on the other". Pridmore says that the Surat council's comment upon the inscription Charles the second, King of England' perhaps indicates that while the obverse was the normal Anglina type, the reverse was inscribed in Persian with that above inscription. The above coin has Persian inscription on both sides. In 1681 a pirate named Henry Bridgeman (also known as Every) attacked and captured a ship called the Ganj-e-Sawai carrying a cargo of 6 Lakhs of Rupees and many people returning from the Haj. His capture of the ship and abuse of the people aboard outraged the Indian Princes on the Western Coast. Mughal chronicler Khafi Khan recorded: "This loss was reported to Aurangzeb, and the newswriters of the port of Surat sent some rupees which the English had coined at Bombay, with a Superscription containing the name of their impure King. Aurangzeb then ordered that the English factors who were residing at Surat for commerce should be seized. Orders were also given to Itimad Khan, superintendent of the Port of Surat, and Sisi Yakut Khan, to make preparations for besieging the fort of Bombay."

William and Mary Rupee

2055*

Bombay Presidency, 1693-1694, Indian Design, Bombay Minting, silver rupee in the name of King William and Queen Mary (1689-1694), Regnal Year 5 (issued 13 Feb. 1693-12 Feb. 1694), Persian inscriptions reading on the obv. "Coin struck during the reign of King William and Queen Mary" rev. "in their 5th regnal year. Coin of the English Company. Struck at Bombay", (Pr. 27, KM. SAC P.27 unpriced). *Light grey toned, nearly extremely fine and extremely rare.*

\$2,500

Ex Spink Australia in 1989.

This issue has a most interesting background. In 1693 the written records note that Emperor Aurangzeb was very displeased with an issue of coins from the East India Company in Bombay. A Khafi Khan from the emperor, in another source is reported visiting the Company at Bombay and complained of the name of the "Impure King" on the coins issued without his Emperor's authority, which were shown to him in A.H. 1105 (Sept. 1693

- Aug. 1694). At Bombay, the East India Company had previously issued rupees with English text in 1677 but these failed to gain acceptability and were soon melted down. Aurangzeb objected specifically to the coin issued above, because it carried the names of King William III and Queen Mary. These coins he claimed could be confused with Aurangzeb own coinage and thus provoked the emperor. The English in return explained that they coined money in their own King's name by stating that they had to purchase investments at places where the Mogul's money did not pass. The emperor's protest was effective and they ceased to issue any more coins and most were withdrawn and melted down, hence their scarcity today. Coins of this type were unknown up to 1960, although the issue was certain from the records, then a few specimens were located in the collection of the Prince of Wales Museum in Bombay (five rupees and a half rupee). A large hoard of 2000 rupees buried about 1696, found near Bombay in 1980, containing rupees of Aurangzeb, also contained a few (about six (6) is stated of these William & Mary rupees). This specimen it is believed comes from this hoard.

2056*

Bombay Presidency, Indian design, Bombay (Mumbai) Mint issue, in the name of Shah Jahan II (A.H.1131, A.D. June-July 1719), silver rupee, [A.H. 1131], Regnal Year 1; (1719), (Pr. 32, KM.160, KM.SAC 415.20-Rare). *Schrof mark in reverse field, otherwise good very fine and very rare.*

\$200

Ex Colin E. Pitchfork Collection and Noble Numismatics Sale 48 (lot 2051), acquired from Steve Album, April 17, 1986 by private treaty. See detailed discussion on the commencement of this coinage in Pridmore, pp.111-114. The initial issues commenced under Emperor Farrukhsiyar in 1717 and continued to the end of his reign and for the short reign of Shah Jahan II, and then regularly until after the death of 'Alamgir II in 1759.

2057*

Bombay Presidency, Indian Design Bombay Minting, fifth rupee in the name of Shah Jahan II (A.H. 1131, June-July 1719), year Regnal Year 1, issued June-July 1719, (Pr. 34, KM. SAC P.34). *Round flan with subdued blue and gold tone, and an exceptional strike, extremely fine and very rare.*

\$200

Ex Glendining's 1964 and Colin E. Pitchfork Collection, Noble Numismatics Sale 48 (lot 2052). 2059

Bombay Presidency, Indian Design, Bombay Minting, fifth rupee struck under Muhammad Shah (A.H.1131-1161, A.D. 1719-1748), regnal year 2 (3?), another 5, another 9, (Pr. 60, 61, 62, KM. (SAC) P.60, KM. 271). *Very fine and scarce.* (3)

\$80

Ex Spink Australia, Sale 8, (lot 46 [part]) and Colin E. Pitchfork Collection, Noble Numismatics Sale 48 (lot 2063). The issue of fifth rupees was continued in the name of Shah Jahan II, through the reigns of Muhammad Shah and Alamgir II. The designs were not changed, but the coin appears not to have circulated in Bombay. However Elliot in "Coins of Southern India" London, 1886 on discussing the velli (or silver) fanam that circulated on the Malabar Coast states: "...was originally coined tentatively in Bombay in 1730 (sic!). It was issued to the value of a 1/5th rupee, as an experiment, when finding that it was readily accepted by the people of Tellicherri and other towns, a new supply was ordered. These old velli fanams had generally the numeral 5 in English ..on one side". These the first type issues, were struck from 1719-1730 at Bombay, and were evidently introduced for the use of the Company's factory at Tellicherry, where they circulated as fanams. See Pridmore pages 114-5 for more detailed discussion.

2060*

Bombay Presidency, Indian design, Bombay (Mumbai) Mint issue, in the name of 'Alamgir II (A.H.1167-1173, A.D. 1754-1759), silver rupee, Regnal Year 5 (1758-9), (Pr. 70, KM.176). *Nearly very fine, rare.*

2061*

Pr.71, KM.; SAC.C.638). *Attractive dark tone, short of flan, otherwise good very fine all apparently unpublished.*

\$80

Ex Colin E. Pitchfork Collection, Noble Numismatics Sale 48 (lot 2069).

2062*

Bombay Presidency, Indian design, Bombay (Mumbai) Mint issue, in the name of 'Alamgir II (A.H.1167-1173, A.D. 1754-1759), silver rupee, trace of regnal year 9 (c. 1762-3), with crescent on reverse (Pr. 75, KM.178). *Very fine, rare.*

2063*

Bombay Presidency, Indian design, Bombay (Mumbai) Mint issue, in the name of 'Alamgir II (A.H.1167-1173, A.D. 1754-1759), silver rupee, regnal year 5 (1758-9), with crescent on reverse, (cf.Pr. 75, KM.176). *Good very fine, excessively rare and unpublished and possibly unique.*

\$200

Ex Robert Senior, England, January 15, 1986 by private treaty (æ70) and Colin E. Pitchfork Collection, Noble Numismatics Sale 48 (lot 2070). The crescent on the coinage for a year 5 rupee changes Pridmore's hypothesis (p.155) that the issue was one with a fixed regnal year of 9. He believes the issue is a posthumous one, and that they were struck at another mint and intended for a particular locality. It is important to note that no known pieces exist with a A.H. or hijri date. However it is more probable that this piece was issued by 'Alamgir II in 1758-9 and represented a change in type to signify the new firman of September 4, 1759. The year 9 issues without change in 'Alamgir II name continued as a posthumous issue under the terms and conditions already specified as the EIC in Bombay no longer considered it necessary to seek a continuation of approval from the new Emperor Shah Alam II.

2064*

Bombay Presidency, Indian Design Bombay Minting, half rupee in the name of Alamgir II (A.H. 1167-1173, A.D. 1754-1759), regnal year 9, with crescent on obverse, (Pr.76, KM. SAC. C.638a). The E.I.C. took over the Surat mint in November 1800, so that regnal year 46, which began 29th July 1803, is an error (See Pridmore pp.126-7), though this was a standard type for both gold and silver issues at Surat and Bombay.

\$150

Ex Glendining's 1964 and Colin E. Pitchfork Collection, Noble Numismatics Sale 48 (lot 2123). Pridmore (p.197) notes that the issue from Calcutta with the new mint mark star took place from July 28th 1757 in the name of Alamgir II and later on coins of Shah Alam II. The issue of this type took place from 1757 - 1765. The issues of Alamgir II were of years only 4 and 5 and of Shah Alam II years 2 - 7. New dies were prepared (p.198) for issues to commence with year 2 and to be ready by 15th July 1761. Examples are known for rupees for Alamgir II, none are known for Shah Alam II, although all fractions were probably issued. Year 2 can, only with this star mintmark, occur for the ruler Shah Alam II. This piece is apparently the first example recorded of an eighth rupee issued for this short period in the name of Shah Alam II from Calcutta mint.

\$250

Ex T. V. Holland Collection and Noble Numismatics Sale 62 (lot 878). The first legend an abbreviation of Dansborg. The building of the fort of Dansborg was started in December 1620 but already in October 1620 duty revenue from the town of Tranquebar was being collected hence small change was necessary. The last example expanded reads Iehovah Dan (Dansborg = Denmark) and the year of issue.

\$250

Ex Glendining's London, July 16, 1976 (lot 79 part) and Colin E. Pitchfork Collection, Noble Numismatics Sale 48 (lot 2048). Codrington in his Memoirs Supplement Pl. No. 13, notes a similar pagoda which is illustrated with a remark as "Possibly of the Tuticorin mint"! A very detailed discussion of these issues is presented in Scholten (pp.138-139). This coin type above ceased to be struck in 1747 because the Dutch Company no longer made profits on the importation of gold from the Far East, and it was not pleased when its pagodas of fineness 0.831 were melted down at other mints to make pagodas of lesser quality.

A further reduction took place in 1767 to a new fineness of 0.769.
